	Thunderstorms

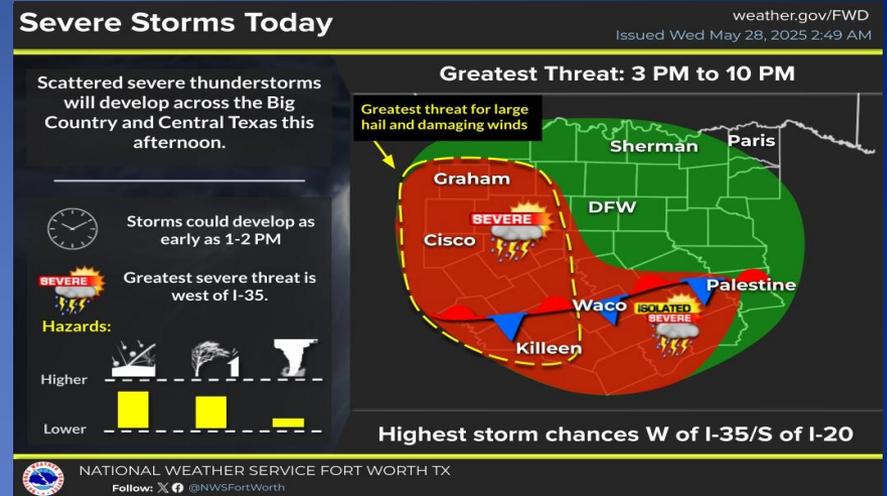

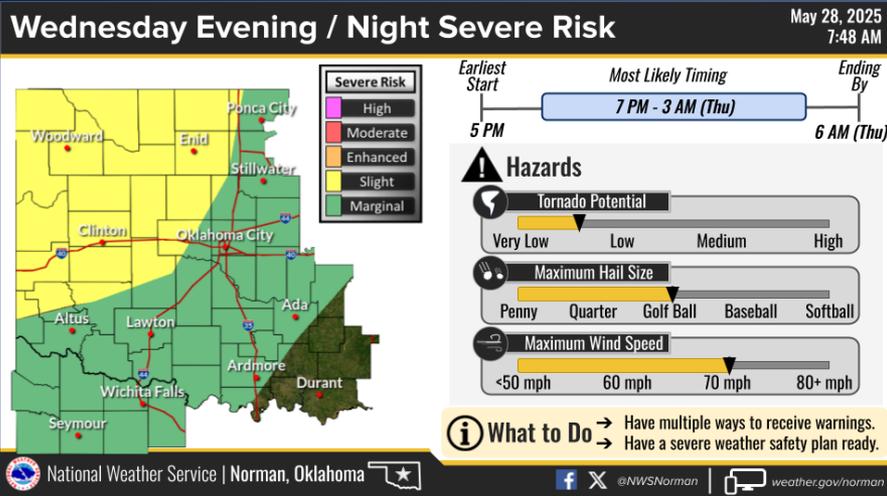

# Hazardous Weather

A broken line of storms is expected to traverse from northwest to southeast across the Panhandles this afternoon and evening, bringing the potential for large hail, damaging winds, and a low tornado threat.

There is a low threat for brief tornadoes this evening associated with a line of thunderstorms, with chance increase from southwest to northeast. These are most likely to occur between 6 PM and midnight tonight. If a tornado does form, it will be very difficult to detect on radar due to how quickly they form and dissipate, especially for storms further away from the radar.

# Hazardous Weather

Scattered severe storms are expected to develop in western North Texas and across Central Texas this afternoon and evening, with the greatest threat west of I-35. Main threats with the initial storms will be large hail and damaging winds. Storms are expected to grow into clusters this evening, transitioning the primary threat to damaging winds. Make sure to stay weather aware today!

# Weather Advisory/Statement/Watch/Warning Issued

DATE	WARNING TYPE	LOCATION
05/27/25	Flood Warning	Angelina, Cass, Cherokee,, Franklin, Gregg, Harris, Harrison, Henderson, Marion, Morris, Nacogdoches, Navarro, Rusk, Smith, and Titus, Counties
