Updated: Sun Jun 01, 2025 2:00 AM

Isolated severe storms (level 1 to 2 of 5 risk) are possible Sunday evening for the eastern half of South-Central Texas, including the Hill Country, northern I-35 corridor, and Coastal Plains. The primary threats are large to very large hail, damaging winds, and locally heavy rain.

Scattered Severe Storms This Afternoon

weather.gov/FWD
Issued Sun Jun 01, 2025 3:04 AM

Additional scattered storms are expected to develop in portions of North and Central Texas this afternoon.

Main Storm Timing: 3 PM - 10 PM

Main Hazards:
Large Hail
Damaging Wind
Frequent Lightning

Have multiple ways to receive weather alerts!

Greatest Threat is Near and South of I-20

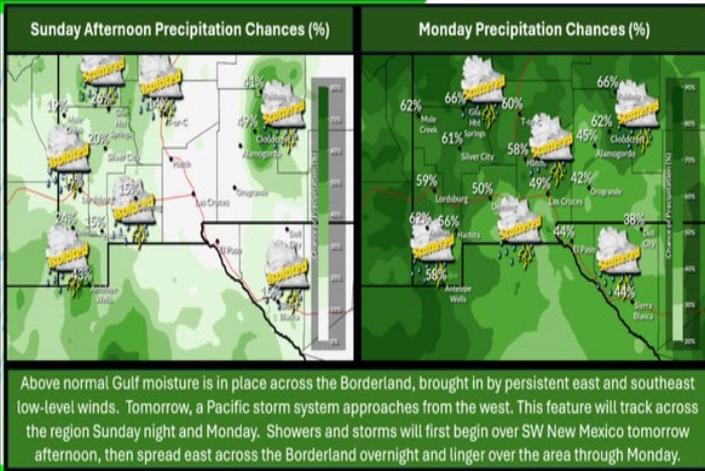

NATIONAL WEATHER SERVICE FORT WORTH TX
Follow: @NWSFortWorth

Additional scattered storms are expected to develop near and south of the I-20 corridor this afternoon and evening. There is a better chance for severe storms, capable mainly of large hail and damaging winds.

Hazardous Weather

Rain and Thunderstorms Chances Sunday thru Monday

West favored Sunday / All areas have chances Sun Nite/Mon

- Gusty outflow winds up to 45 mph
- Winds may pick up dust and reduce visibility
- Cloud-to-ground lightning

Rainfall Amounts of 0.10" to 0.40"

NATIONAL WEATHER SERVICE
EL PASO, TX
Follow: @NWSEIPaso

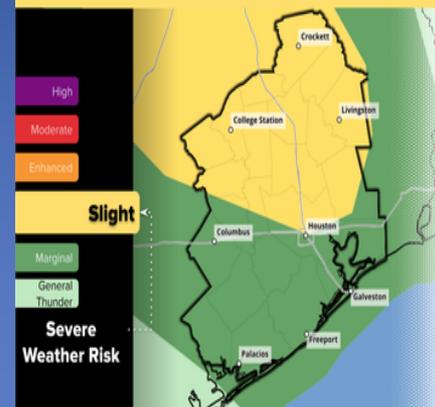

May 27, 2025 | 11:43 AM

Moisture remains in place across the Borderland, and a Pacific low pressure system is moving in from the west. This combination will increase shower and storm chances over western areas Sunday. Through the evening and overnight, Sunday night, we expect showers, and even some storms, to begin shifting east. By Monday, all areas have potential for scattered shower and thunderstorms.

Severe Weather Outlook

Sunday Weather Outlook

Strong to severe storms possible Sunday

Key Messages

- A disturbance moving down from the north will trigger showers and thunderstorms over SE Texas.
- The first round of storms expected during the morning hours. The second round is expected during afternoon and evening hours.
- Isolated strong to severe storms will be possible across the area, with the greatest risk over areas north of I-10.

Potential Impacts

- Damaging wind and hail
- Locally heavy rain
- An isolated, brief tornado cannot be ruled out

Actions

- Remain weather-aware, especially if having outdoor plans.
- Ensure you have multiple ways to receive alerts if severe thunderstorms occur.
- Check the forecast for updates.

Listen: NOAA Weather Radio for Latest Forecasts & Warnings

A disturbance will be moving down from the north on Sunday. Showers & thunderstorms expected in the morning over the Brazos Valley/Piney Woods region and should quickly dissipate as they move southward. Another stronger cluster of thunderstorms is expected to develop over portions of SE Texas in the afternoon and evening. Conditions will be favorable for this second round of storms to be strong to severe at times. Main threats are damaging winds and hail. Cannot rule out a brief isolated tornado. Some locations may also see brief periods of heavy rain.

Hazardous Weather

Today's Severe Thunderstorm Outlook

Highest Local Risk: **Marginal** (Risk Level 1 out of 5)

Isolated thunderstorms are possible Sunday afternoon into the evening, mainly in the Big Country. Large hail and damaging winds are the main threats, along with dangerous lightning.

Sunday Afternoon and Evening

Potential Hazards:

Large Hail (up to quarter size)

Damaging Winds (60+ MPH)

Lightning
