FEMA Region 6 Weather Threat Briefing

Tuesday, October 14, 2025

Disclaimer: The purpose of this briefing is to provide a **Regional** weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information. To find your local NWS forecast office, go to www.weather.gov/srh.

National Oceanic and
Atmospheric Administration
U.S. Department of Commerce

National Weather Service
Southern Region

Summary

- Flash Flooding:

- Slight risk (level 2 of 4) today in NM.
- Ruidoso Burn Scar: Moderate risk (level 2 of 4) today with a minor risk (level 1 of 4) tomorrow.
- **Burn Scar Note: Burn scar flash flooding is generally a threat from June 15 - September 30, aligning with monsoon season. Slides have been extended into mid October for the Sacramento Complex (Ruidoso) burn areas due to the presence of moisture from Eastern Pacific tropical systems. Slides will be discontinued once this threat has ended.**

- Severe Weather:

- Monitoring for severe weather threat on Saturday over E OK, AR, NE TX, N LA.

- Tropical Weather:

- T.S. Lorenzo has formed in the tropical Atlantic. A recurve into the central Atlantic is anticipated with no impacts to FEMA 6.

FEMA Region 6 Threat Matrix

Next 7 days

	Tuesday, Oct 14	Wednesday, Oct 15	Thursday, Oct 16	Friday, Oct 17	Saturday, Oct 18	Sunday, Oct 19	Monday, Oct 20
Severe Storms	NM	NM			E OK,AR,NETX, N LA		
Heavy Rain / Flash Flooding	NM	N/C NM			N AR		
Burn Scars (Jun 15-Sep 30)	S NM	S NM					
Tropical							
Fire Weather							
River Flooding							

Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.
For more details on the colors in the threat matrix refer to the last slide in this briefing.

Risk Levels	Little to None	Minor	Moderate	Major	Extreme
-------------	----------------	-------	----------	-------	---------

Tropical Weather Outlook – Atlantic/Gulf

Areas of Possible Development		
Area	Chance of Development	Potential Impacts to FEMA 6

Active Tropical Cyclones	
Storm	Potential Impacts to FEMA 6
T.S. Lorenzo	None

See <http://www.hurricanes.gov> for the latest on the tropics or any active storms

Tropical Storm Lorenzo

See <http://www.hurricanes.gov> for the latest on the tropics or any active storms

No impacts to FEMA 6.

5-Day Precipitation Forecast & River Flood Status

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

River flooding is not anticipated.

Note: Numerical levels (e.g. level 1 of 4) will not be assigned to riverine flooding due to the varying levels of impacts across flood categories.

Today's Weather

Slight risk (level 2 of 4) for flash flooding in NM.

Marginal risk (level 1 of 5) for severe storms over NM.

Today's Tornado & Severe Wind / Hail Probabilities

Burn Scar Debris Flow Risk - Ruidoso, New Mexico

Sacramento Complex

	Tuesday, Oct 14	Wednesday, Oct 15	Thursday, Oct 16	Friday, Oct 17
Flash Flooding	Moderate	Minor		
Timing - CDT	2PM - 2AM	Evening		

Burn Scar Note: Burn scar flash flooding is generally a threat from June 15 - September 30, aligning with monsoon season. Slides have been extended into mid October due to the presence of moisture from Eastern Pacific tropical systems. Slides will be discontinued once this threat has ended.

Little to None	No Flash Flood Threat
Minor (level 1 of 4)	Slight Risk of Flash Flooding
Moderate (level 2 of 4)	Probability of Flash Flooding Issuance 40% to 60%
Major (level 3 of 4)	Flood Watch Issued OR Debris Flow Probability > 50%
Extreme (level 4 of 4)	Life Threatening Flash Flooding Likely - Historic Type Day
- WPC's Excessive Rainfall Outlook is <i>Not Applicable</i> to burn scars. *Note* 2nd year burn scars can be <u>more dangerous</u> than year 1.	

Tomorrow's Weather

Marginal risk (level 1 of 4) for flash flooding over N/C NM.

Marginal risk (level 1 of 5) for severe storms over NM.

Weather “Threat” Matrix for FEMA Region VI			
Color	Definition	Criteria	Example(s)
Green	Little to None Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	- Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees - Something that happens almost every day in a particular season such as seabreeze storms in coastal TX
Yellow	Minor Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible - Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1” hail
Orange	Moderate Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	- A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely - Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail - Some large fires reported, burn bans advertised, critical conditions expected
Red	Major Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	- A Category 1 hurricane will be moving towards the NW Gulf in the next few days - Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail - Large fires ongoing throughout the area with critical fire weather conditions expected to continue
Purple	Extreme Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	- A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow - Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms
