Heavy Rain Potential Focusing North/West Of Our Area

Locally Heavy Rainfall Can't Be Completely Ruled Out

**Key Messages**

- A weakening cold front will bring a line of showers and thunderstorms on Friday.
- Rainfall will be manageable, but an isolated strong storm with locally heavy rainfall can't be ruled out, especially north of the Houston metro.
- **Marginal Risk (level 1 of 4)** of Excessive Rainfall mainly for areas north of Harris County.
- **Slight Risk (level 2 of 4)** of Excessive Rainfall for the north Burleson and north Brazos Counties.

**Timing**

- Friday morning.
- Potential for showers and a few storms will carry through the weekend, but will be lighter and more scattered.

**Impacts**

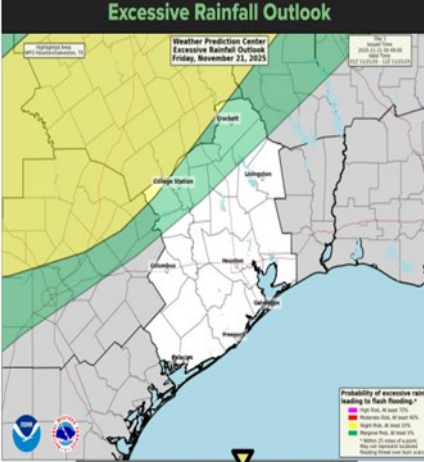

- Mostly manageable rainfall, but minor flooding can occur if highest rain rates occur over vulnerable locations.

**Actions**

- Remain weather-aware, particularly if you have plans to be out late Thursday night/early Friday morning north of the Houston metro.

Excessive Rainfall Outlook
Friday, November 21, 2025

Flash Flood Risk: 1 2 3 4

Updated: Fri Nov 21, 2025 5:51 AM

A weakening front will move across Southeast Texas on Friday. The heavy rain threat will be focused mainly north and west of our area, though some portions of Southeast Texas can't yet rule out isolated issues if a stronger storm occurs over a spot vulnerable to flooding. The front will continue to weaken as it moves towards the coast, and the heavy rain threat will begin to wane as it moves through the area.

Probability of Excessive Heavy Rainfall

Have Multiple Ways to Get Severe Weather Warnings.
Latest info at weather.gov/shv

At Least **15%** Chance for Flash Flooding Sunday and Monday

**Monday 11/24**
Flooding Risk
Level: 2 of 4

**Impacts**

- ← **Sunday:** Southeast Oklahoma and extreme Northeast Texas
- **Monday:** Threat expands east to cover all of the Four State Region

**Timing**

- ← **Sunday:** Late evening through the overnight hours
- **Monday:** During the day through late Monday night
