

**Texas Division of Emergency Management
State Situation Report**

Event Name	26-0016 New World Screwworm Response
Date	August 07, 2026
Time	4:00 PM
Reporting Period	2:00 PM August 06, 2026, to 2:00 PM August 07, 2026
Report Number	62

TDEM Regions Affected	5, 6, 7
Disaster Districts Activated	N/A

STATEWIDE CURRENT SITUATION: The Texas Disaster Portal continues to be updated regularly with the latest guidance, resources, and information from state agencies engaged in the response to New World Screwworm. The one-stop-shop portal, located on the Texas Division of Emergency Management website, can be accessed online at screwworm.texas.gov.

The Texas Animal Health Commission (TAHC) continues to respond to the NWS through coordinated livestock inspections, movement permitting, compliance monitoring, laboratory diagnostics, and stakeholder outreach. Field personnel are conducting inspections, facilitating the safe movement of livestock, enforcing movement requirements, and working with producers to identify and treat suspected cases. Regional staff and laboratory specialists are supporting rapid identification and response efforts, while ongoing education and regularly updated public resources help promote surveillance, reporting, and awareness across the state.

The Texas Parks and Wildlife Department (TPWD) continues to support the State's NWS response by coordinating wildlife surveillance, assisting partner agencies, and protecting Texas' natural resources. Staff are working with landowners and partners to monitor wildlife through field inspections, routine wildlife handling, hunter-harvested animals, roadkill observations, and public reporting. The department also supports surveillance by securing trap locations, monitoring game cameras across state parks

and wildlife management areas, investigating suspected cases, and ensuring trained personnel are available to assist with detection, prevention, and response efforts.

The Texas A&M AgriLife Extension Service continues to support NWS preparedness efforts by providing the Livestock Inspection Education Course through the AgriLife Learn platform. Participation continues to grow, with thousands of individuals enrolled and many completing the training to strengthen livestock inspection awareness and response capabilities.

The Texas Department of State Health Services (DSHS) remains at an increased state of readiness and continues to coordinate with state and local partners to support the New World screwworm response. While prepared to respond to any potential human health impacts, current efforts remain focused on outreach, education, and preparedness by providing guidance, training, and resources to animal control officers, veterinarians, local health departments, law enforcement, and other stakeholders. Regional staff continue to strengthen coordination, support surveillance activities, and ensure partners have the latest information for identifying, reporting, and responding to suspected cases.

On June 19, Governor Greg Abbott announced the launch of an enhanced website that offers comprehensive information for Texans related to the New World Screwworm (NWS). Located in TDEM's Disaster Portal, Texans can visit screwworm.texas.gov to access a "one-stop shop" of information and resources from state agency partners engaged in NWS response.

State agencies are working closely with local, state, and federal partners in the field and at the State Emergency Operations Center. State partners have contacted thousands of landowners and stakeholders and remain engaged and prepared to support response operations as efforts continue to prevent further spread of NWS.

On June 8, Governor Abbott directed TDEM to activate the Texas State Emergency Operations Center to Level II (Escalated Response) to support the state's New World Screwworm response operations.

Resources from multiple state agency partners and the U.S. Department of Agriculture (USDA) are being leveraged in response to this parasite detection.

On June 5, following confirmation of NWS detection in Texas, Gov. Abbott received a briefing and provided an update to Texans on the state's response at the Texas State Emergency Operations Center. The Governor also issued an updated state disaster declaration to address NWS and prioritize operations in Uvalde and Zavala counties.

On January 26, Gov. Abbott issued a statewide disaster declaration certifying that the spread of NWS threatened Texas's livestock industry and economy and posed an imminent threat of widespread and severe property damage for all Texas counties. The declaration also authorized the use of all available resources of the state government to cope with this disaster and allowed for the allocation of state resources to address the spread of the parasite to the Texas NWS response team.

On June 25, 2025, Gov. Abbott directed the Texas Animal Health Commission and Texas Parks and Wildlife Department to establish a joint Texas New World Screwworm Response Team to lead the state's prevention and response efforts.

For more than 18 months since being informed of a positive case of NWS in Mexico, the USDA has been working to combat the impacts in coordination with state and local partners. Such measures by the USDA include importing and dispersing sterile flies in South Texas, outreach with local producers, and building a facility to assist with sterile fly operations.

The Texas Emergency Management Council continues to monitor developments.

OPERATIONAL PRIORITIES:

- Protect life and property.
- Support rapid & effective response.
- Collect and disseminate accurate incident information to improve decision-making.
- Accurately track incident costs associated with assigned resources for cost recovery.

RESPONDING STATE AGENCIES/ORGANIZATIONS REPORTS

Texas Division of Emergency Management (TDEM):

On June 8, the State Operations Center (SOC) activated to Level II (Escalated Response) in support of the New World Screwworm incident. The SOC continues directing interagency coordination to maintain unified communication, deploy necessary resources, and support response operations in affected regions across Texas.

TDEM Regional staff continue to remain engaged with local officials across impacted areas as well as areas that have not experienced cases.

Coordination between local, state, federal, industry, and private-sector partners remains ongoing.

Texas Animal Health Commission (TAHC):

NWS Statistics

as of [8/7/26](#) at 2:00 pm:

Total Confirmed Cases in Texas: 44

Counties affected	Total positive cases	Species affected
-------------------	----------------------	------------------

Terrell	1	sheep
Brewster	2	cattle
Sutton	1	goat
Starr	1	cattle
Counties affected	Total inactive cases	Species affected
Zavala	3	cattle
Sutton	2	Sheep, canine
La Salle	2	cattle
Gillespie	1	goats
Pecos	4	Canine, sheep
Crockett	11	sheep, cattle, goats
Edwards	5	cattle, goats, sheep
Tom Green	1	cattle
Terrell	4	cattle, goats
Medina	1	cattle
Jim Hogg	1	cattle
Schleicher	1	sheep
Uvalde	1	cattle
Brewster	2	cattle

NWS Certified Inspector Program Statistics

As of 8/7/26 at 2:00 PM

Application in Process	0
Certified Inspectors	791

**TAHC expanded eligible applicants to include emergency management personnel. As the program rolls out, TAHC is evaluating expansion of the program to additional groups*

Mission Information and Details

- To date, TAHC has inspected 33,676 animals in the infested zones, and 1,334 certificates have been issued for movement out of the infested zones.
- TAHC inspectors have been mobilized to conduct animal inspection/movement/outreach within the identified infested and adjacent zones.

These groups will conduct inspections of livestock to identify myiasis, assist producers with topical/systemic treatments, and collect larval samples for official laboratory identification. Additionally, they will perform pre-movement inspections, ensure proper treatment compliance, and issue official NWS movement certificates as quickly as possible.

- On [August 6](#), a total of [19](#) inspections were completed on [460](#) animals moving out of the infested zones.
- TAHC compliance and checkpoint strike teams are operating roadside checkpoints. Roadside checkpoints have been established within the infested and adjacent zones to ensure NWS guideline compliance.
- On [August 6](#), a total of [24](#) stops were completed; [11](#) stops were provided for education/outreach, and [13](#) verified NWS guideline compliance.
- Livestock Market inspections are being conducted to screen livestock for signs of myiasis and verify that all animals entering a market from an Infested Zone possess a valid NWS movement certificate. Animals moving to slaughter are monitored to ensure they enter proper slaughter channels, and any changes to a non-slaughter status are confirmed to receive immediate treatment at the market.
- TAHC Regional Staff are working with local producers in the region to answer questions and assist with the coordination of local jurisdictions and assets.
- NWS Identification Specialists, located at the NVSL Mobile Lab and USDA Agricultural Research Service (ARS) Lab, are screening suspect larval and fly submissions from the infested and adjacent zones for rapid identification. One (1) TAHC entomologist has been assigned to the mobile laboratory to assist.
- Providing information, outreach, and education to industry, animal owners, stakeholders, and the public about NWS to encourage surveillance and proper reporting.
- The [TAHC New World screwworm webpage](#) is updated regularly to provide information and resources, as it becomes available.

As of August 6

- On August 5, 2026, NWS was detected in a sheep in Terrell County. Due to the new detection of NWS in Pecos County, the following areas of Crockett, Pecos, and Terrell Counties are designated as Infested Zone 08.A.
- In collaboration with Texas A&M AgriLife Extension Service, TAHC is providing animal owners and producers, veterinarians, New World Screwworm (NWS) Certified Inspectors, and other stakeholders with a quick-reference resource outlining current animal movement requirements related to NWS. This platform contains content to facilitate TAHC-compliant animal movement and is designed

to simplify the identification of the correct movement requirements for various situations.

The situation is evolving, and new information will be provided as investigations continue.

Executive Director Orders identifying Infested Zones remain in effect, pursuant to Texas Agriculture Code, Chapters 161 – 168, and applicable regulations found in Title 4 of the Texas Administrative Code, Part 2, Chapters 31-60. This order remains in effect until the quarantine is released by the Commission.

Texas Parks and Wildlife Department (TPWD):

To protect the State's natural resources, including fish and wildlife, through land-based and marine patrol, TPWD will serve as a force multiplier responding to requests for support from our federal, state, and local partners to prevent, detect, control, or eradicate parasitic disease outbreaks. TPWD will deploy coordinated resources to prevent, detect, control, and eradicate parasitic disease within the Texas-Mexico Border region.

TPWD staff will continue to coordinate native wildlife surveillance efforts, which will include:

- Working with landowners to organize active wildlife surveillance on their properties
- Inspection of hunter-harvested carcasses when necessary, including animals harvested in State Parks and Wildlife Management Areas.
- Inspection of recently road-killed wildlife.
- Inspection of animals is handled as part of routine wildlife handling, whether that is by agencies, researchers, or other entities that encounter wildlife regularly.
- Reporting from wildlife rehabbers, private practice vets, law enforcement, taxidermists, game processors, and the public.

As of August 7

- TPWD staff have investigated 6,191 animals statewide and investigated 54 suspect cases.
- TPWD have secured an accumulated total of 123 locations for NWS traps and 22 locations for GRC's for the USDA and TAHC.
- TPWD staff are monitoring 143 game cameras in 21 state parks; 448 cameras on 37 Wildlife Management Areas (WMAs),

- San Angelo State Park, located in the Tom Green IZ is monitoring 4 game cameras, and 3 cameras are being monitored at Devils Sink Hole, located in the Edwards SZ. TPWD's Kerr WMA, located within the Gillespie SZ, is monitoring 5 game cameras. Chaparral WMA, located in the La Salle IZ and SZ, is monitoring 10 game cameras. Elephant Mountain WMA, located in the Brewster IZ, is monitoring 14 cameras for signs of NWS infestations.
- WL Division currently has 84 staff who have completed the AgriLife NWS training.

As of August 6

- All cooperating landowners located inside all active IZs and SZs (2,731) have received phone calls and updates on the NWS situation in their area.

As of August 5

- To date, TPWD staff have contacted 7,541 TPWD cooperators and permit holders to notify them of the NWS situation and promote surveillance.

Texas A&M AgriLife Extension Service (AgriLife):

Currently, the AgriLife Extension SOC liaison, Public Information Officer (PIO), Disaster Assessment and Recovery (DAR) Team Members, DAR Administration, Extension Administration, and County Extension Agents are monitoring NWS movement and conditions, SOC response activity, and participating in weekly communication calls with Extension Administration, Entomologists, and Livestock Specialists. Disaster Assessment and Recovery Specialists are on standby to support County Extension Agents and ESF-11 partners with public education, animal response, and recovery efforts as requested. PIO continues to develop educational and outreach materials for publication and continues to participate in daily Joint Information Center activities.

Since June 2025, leading up to the first confirmed NWS case in Texas, AgriLife has:

- Conducted educational programs on NWS reaching over 21,200 participants.
- Established an 18-member working group of Extension Specialists across livestock, wildlife, and human disciplines focused on the development of educational information, outreach techniques, and resources for use by County Extension Agents and other appropriate Extension personnel across Texas.
- Developed a County Extension NWS Educational Toolkit, complete with videos and PowerPoint Slide Decks for use in local producer and community educational outreach efforts.
- Through a grant from USDA-APHIS, Texas A&M AgriLife Extension has distributed 1,000 NWS larva collection kits among the Southern and Western County Extension offices for use in NWS detection and identification.
- Provided expertise with local and state government representatives to

better inform their preparation should an incident occur.

- Texas A&M AgriLife Extension livestock entomology specialist conducted an NWS awareness training during the monthly meeting of the Extension Disaster Education Network (EDEN) Agricultural Committee, as well as more in-depth training during the May 2026 EDEN webinar hosted by the EDEN professional development committee.
- The Ag Alert pest and disease alert system has seen a 600% increase in subscribers since the first detection of NWS on June 3. As of July 13, there were 1,698 subscribers. NWS cases are being posted on the site, along with other animal and plant pest and disease cases.
- As of July 13, 2026, the following online printable resources are now available through the AgriLife Extension New World screwworm hub:
 - The AgriLife Extension pocket guide is available as a printable resource on the AgriLife website. The pocket guide provides basic information about New World screwworm, available treatment options, and general resources for Texans.
 - A Field Guide for Beef Cattle Producers provides early detection information, reporting, sample collection, submission, and treatment information. This resource is also available on the AgriLife Extension NWS hub.

As of August 7

- The New World Screwworm Preparedness and Response Education Course for Livestock Inspection remains available on the AgriLife Learn website. As of 8:30 am August 7, 6,195 individuals had enrolled, with 3,048 completing the modules and earning completion certificates.

Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL):

The Texas A&M Veterinary Medical Diagnostic Laboratory (TVMDL) has deployed one laboratory professional to the Texas Animal Health Commission's (TAHC) Pleasanton office to join the United States Department of Agriculture mobile detection unit deployed from USDA's National Veterinary Services Laboratory (NVSL). The lab is now operational and accepting samples for identification. A second professional remains stationed in the State Operations Center (SOC) in Austin.

TVMDL is educating clients to contact TAHC for triage of a suspected fly or larvae instead of direct submission to TVMDL. However, TVMDL Client Services staff review every daily submission and flag any cases submitted for fly/larvae ID. Laboratorians who have passed the USDA proficiency test for NWS identification stand ready to review submissions and will immediately contact TAHC and USDA should a suspect case be identified. Suspect samples will be routed as directed by TAHC and USDA.

Staff participate in the TAHC Virtual Joint Information Center daily calls.

Laboratory personnel at all four agency locations are on standby to support ESF-11 partners as needed.

TVMDL veterinarians are assisting the Texas A&M AgriLife Extension Service in producing screwworm collection kits.

TVMDL is working to validate high-throughput testing, should the need arise.

As of August 7

- TVMDL received 6 submissions from USDA/TDA traps on August 06, 2026. TVMDL did not receive any submissions from private citizens. TVMDL did not assist with any submissions at the NVSL mobile lab on August 06, 2026. In total, 6 submissions were received by TVMDL College Station on August 06, 2026.

Texas Department of State Health Services (DSHS):

DSHS State Medical Operations Center (SMOC) is at Increased Readiness in support of this incident. DSHS continues working with state partners and lead agencies to ensure ESF-8's ongoing support.

DSHS is prepared to support, as needed, to assist in protecting the Texas livestock industry and wildlife. DSHS is ready to respond to human cases, should that occur.

August 7 – Ongoing Coordination

- DSHS Public Health Region – 4/5N (Piney Woods Region)
 - 8/6/2026, PHR 4/5N hosted a NWS tabletop for animal control officers in Mt. Pleasant. 16 participants were in attendance including five animal control agencies and one sheriff's department. Agency partners included DSHS, TAHC, and TPWD.
 - Recent TBVME guidance for shelters was distributed to area shelters and veterinarians.

August 6 – Ongoing Coordination

- DSHS Public Health Region – 1 (Northwest Texas Region)
 - On August 5, PHR 1 Zoonosis Control gave an NWS presentation to 20 individuals attending the Local Rabies Control Authority meeting. Attendees included a local health jurisdiction, 17 Animal Control Officers, a veterinarian, and a sheriff.
- DSHS Public Health Region – 7 (Central Texas Region)
 - PHR7 Zoonosis Control Program emailed NWS information and NWS resources via the quarterly newsletter to approximately 950 stakeholders including ACOs, law enforcement, code enforcement, county judges, county sheriffs, local health

departments, local health authorities, human and veterinary medical-related personnel.

- PHR 7 deployed veterinarian reviewed NWS epidemiological initial interview and premises animal inspection reports from cases in most recent infested area.

DSHS staff across regional offices continue reaching out to partners to ensure animal control officers, veterinarians, local health departments, county judges, tribal nations, and other regional partners have the latest guidance and resources for identification, sampling, and reporting NWS.

Texas Department of Agriculture (TDA):

The Texas Department of Agriculture continues to conduct surveillance, gather intelligence, collect evidence, and monitor any signs of the New World Screwworm fly in relevant portions of the state. Traps specific for the New World Screwworm have been deployed and are continually monitored, with all suspect samples sent to our state and federal partners for identification of suspect fly species.

Texas Commission on Environmental Quality (TCEQ):

TCEQ continues to closely monitor the NWS response and will coordinate with state and federal partners to provide technical assistance and guidance on carcass disposal.

Texas Department of Transportation (TxDOT):

TxDOT continues to support the State Operations Center through daily coordination and situational awareness activities. The department is coordinating with TAHC on compliance checkpoint locations as the New World Screwworm response expands, providing affected districts with operational updates. TxDOT Emergency Management personnel also distribute daily response information and educational materials statewide to maintain awareness and support coordinated operations.

Texas Military Department (TMD):

The Texas Military Department (TMD) is supporting state agency partners in response with a SOC support team. TMD has activated an Aerial Dispersal Team in South Texas to assist partners with sterile fly dispersal.

Texas Cyber Command (TXCC):

TXCC is monitoring the situation and stands ready to support the state's response efforts. TXCC is monitoring the situation using cybersecurity tooling and threat intelligence feeds. No cyber threats related to this event have been identified.

Texas Department of Public Safety (DPS):

As DPS continues to support NWS response, the updated checkpoints for La Salle, Edwards, Gillespie, Tom Green, Crockett, Medina, Jim Hogg, Brewster, and Starr Counties have been distributed to DPS field personnel. THP personnel continue to patrol the affected areas identified by TAHC. THP is available to respond to assistance requests.

Texas A&M Veterinary Emergency Team (VET):

On June 18, VET returned from an assigned status in the field to an available status from home stations and remains available on an as-needed basis.

Texas A&M Forest Service (TAMFS):

TAMFS is providing agency personnel to assist TAHC as checkpoint investigators in the screwworm-infected zones and PIO support at the State Operations Center and Command Post.

STATE RESOURCES COMMITTED

Agency	Resource Kind and Type	Personnel	Equipment	Status	Location
TDEM	SOC Support	13	0	Activated	SOC
AgriLife	SOC Liaison	2	2	Assigned	Austin

FINAL COMMENTS: The State Operations Center (SOC) is currently operating at Level II (Escalated Response Conditions). The Texas Division of Emergency Management (TDEM) continues to monitor the situation and will provide additional situation reports as needed.

The four levels of SOC activation are:

- Level I (Emergency Conditions)
- Level II (Escalated Response Conditions)
- Level III (Increased Readiness Conditions)
- Level IV (Normal Conditions)

This Situation Report can be found on the TDEM webpage at:
