FEMA Region 6 Weather Threat Briefing

Thursday, September 24, 2026

Disclaimer: The purpose of this briefing is to provide a **Regional** weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information. To find your local NWS forecast office, go to www.weather.gov/srh.

National Oceanic and
Atmospheric Administration
U.S. Department of Commerce

National Weather Service
Sector 2 - Texas, Gulf Coast, and Puerto Rico

Summary

- **Flash Flooding:**

- **Slight risk (level 2 of 4) today over NM, W OK, TX/OK Panhandles and far W TX. Marginal risk (level 1 of 4) tomorrow over the same areas.**
- **High risk (level 3 of 3) for burn scar flooding over the Sacramento Complex through Friday with rainfall rates of 1-2"/hr.**
- **Rivers in NM may see rises of Action to Minor flood stage.**
- **Additional Pacific moisture will combine with a cold front to produce a marginal risk of flash flooding starting Sunday over W NM and will progress eastward across the Region through the middle of next week.**
 - **Mainly beneficial rainfall expected but if front slows down, flash flooding risk will increase.**

- **Tropical:**

- **Tropical Storm Fay has redeveloped in the Central Atlantic and is moving westward. No impacts to FEMA 6.**
- **A wave off the west coast of Africa has a high chance of development. No impacts to FEMA 6.**

FEMA Region 6 Threat Matrix

Next 7 days

	Thursday, Sep 24	Friday, Sep 25	Saturday, Sep 26	Sunday, Sep 27	Monday, Sep 28	Tuesday, Sep 29	Wednesday, Sep 30
Severe Storms			W OK, E TX Panhandle				
Heavy Rain / Flash Flooding	NM, W OK, TX/OK Panhandles, Far W TX	NM, W OK, TX/OK Panhandles, W TX		W NM	NM, Far W TX	NM, OK, NW TX	E TX, AR, LA
Fire Weather							
Tropical							
River Flooding	Monitoring NM						

Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.
For more details on the colors in the threat matrix refer to the last slide in this briefing.

Risk Levels	Little to None	Minor	Moderate	Major	Extreme
-------------	----------------	-------	----------	-------	---------

Tropical Weather Outlook – Atlantic/Gulf

Areas of Possible Development		
Area	Chance of Development	Potential Impacts to FEMA 6
I	High	None over the next 7 days

Active Tropical Cyclones	
Storm	Potential Impacts to FEMA 6
Fay	None

See <http://www.hurricanes.gov> for the latest on the tropics or any active storms

Current Radar/Hazards

Flood Watches in NM, W TX and portions of the Panhandle through tonight/Friday morning.

5-Day Precipitation Forecast & River Flood Status

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

Monitoring for rises across NM.

Note: Numerical levels (e.g. level 1 of 4) will not be assigned to riverine flooding due to the varying levels of impacts across flood categories.

National Oceanic and
Atmospheric Administration
U.S. Department of Commerce

Burn Scar Debris Flow Risk - Ruidoso, New Mexico

Sacramento Complex

	Thursday, Sep 24	Friday, Sep 25	Saturday, Sep 26	Sunday, Sep 27	Monday, Sep 28
Flash Flooding	High	High	Low	Low	
Timing - CDT	Ongoing	Ongoing	-	-	

Low (level 1 of 3)	Less than 30% chance of flash flood warning.
Moderate (level 2 of 3)	30-70% chance of flash flood warning.
High (level 3 of 3)	Over 70% chance of flash flood warning.
WPC's Excessive Rainfall Outlook is <i>Not Applicable</i> to burn scars.	

Today's Weather

Slight risk (level 2 of 4) for flash flooding over NM, TX/OK Panhandles, W OK and far W TX.

Burn Scar Flash Flooding information on Burn Scar Matrix slides

Tomorrow's Weather

Marginal risk (level 1 of 4) for flash flooding over NM, W OK, TX/OK Panhandles, W TX.

Burn Scar Flash Flooding information on Burn Scar Matrix slides

Saturday's Weather

Marginal risk (level 1 of 5) for severe storms over W OK and the ETX Panhandle. Damaging winds the main threat.

Burn Scar Flash Flooding information on Burn Scar Matrix slides

Sunday's Weather

Forecast Chart

Forecast Rainfall

Marginal risk (level I of 4) for flash flooding in W NM.

Severe Weather Outlook

Excessive Rainfall Outlook

Weather “Threat” Matrix for FEMA Region VI

Color	Definition	Criteria	Example(s)
Green	Little to None Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	- Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees - Something that happens almost every day in a particular season such as seabreeze storms in coastal TX
Yellow	Minor Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible - Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1” hail
Orange	Moderate Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	- A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely - Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail - Some large fires reported, burn bans advertised, critical conditions expected
Red	Major Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	- A Category 1 hurricane will be moving towards the NW Gulf in the next few days - Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail - Large fires ongoing throughout the area with critical fire weather conditions expected to continue
Purple	Extreme Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	- A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow - Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms
