and Gusty
winds

Timing

Most Likely:
7 AM Tuesday
through 7 AM
Wednesday

Information & Preparedness

- The most significant potential for flooding may occur during this time period given repeated rounds of rainfall and recent saturated grounds.
 - This will quickly lead to runoff and increased chance for flash flooding.
- Turn around, don't drown!

National Weather Service | Amarillo

Follow Us: @NWSAmarillo

As tropical moisture continues to stream into the region, several rounds of rain, some heavy at times, could bring at least a 40% chance for excessive rainfall and flash flooding to a large portion of the combined Panhandle. The heaviest rainfall rates will most likely occur Tuesday evening into Wednesday morning.

Flood Watch

weather.gov/ElPaso

Updated: Mon Sep 28, 2026 4:09 AM

Valid: Noon Monday through 6 am Wednesday

Southern New Mexico and Far
West Texas

- Widespread showers and storms capable of producing high rain rates
- Multiple rounds of rain expected
- Isolated amounts of 3-4"

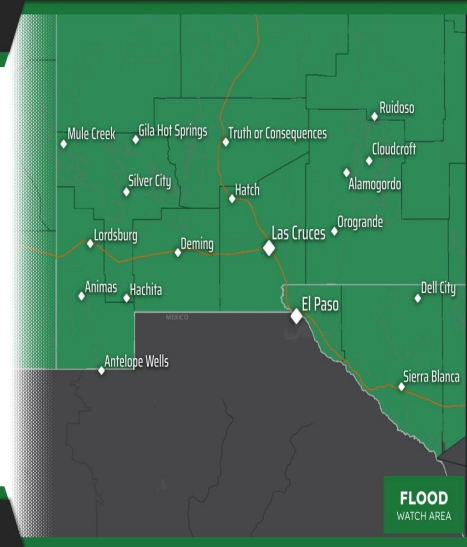

- Flooding of rivers, streams, arroyos, and other flood prone areas
- Recent rainfall from last week will increase the flood risk

NATIONAL WEATHER SERVICE

EL PASO TEXAS

Follow Us: @NWSElPaso

A Flood Watch is in effect area-wide from Monday afternoon through Wednesday morning.

Hazardous Weather

Flood Watch

Monday Night Through Early Wednesday Morning

Southeast New Mexico, Far West Texas, and Guadalupe Mountains

Rainfall amounts of 1 to 2 inches, with very isolated amounts between 3-4 inches possible in the heaviest showers and storms.

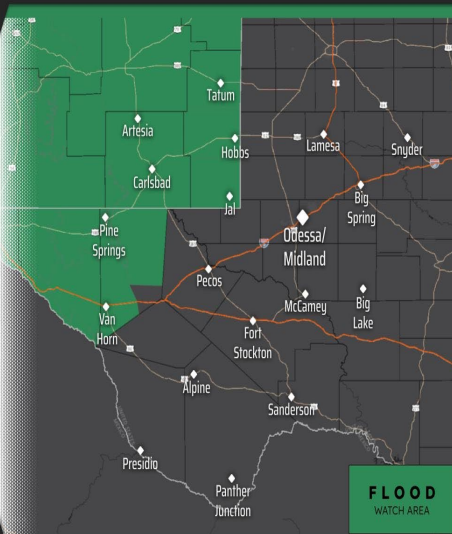

IMPACTS: URBAN-STREET FLOODING, HEAVY RAIN, FLASH FLOODING

What to Do: Prepare for heavy rain that could produce flooding and flash flooding. Drive carefully as wet roads could lead to hydroplaning.

National Weather Service · Midland/Odessa, TX

Updated: Sun Sep 27, 2026 1:42 PM

Turn around. Don't drown.
Latest info at weather.gov/Midland

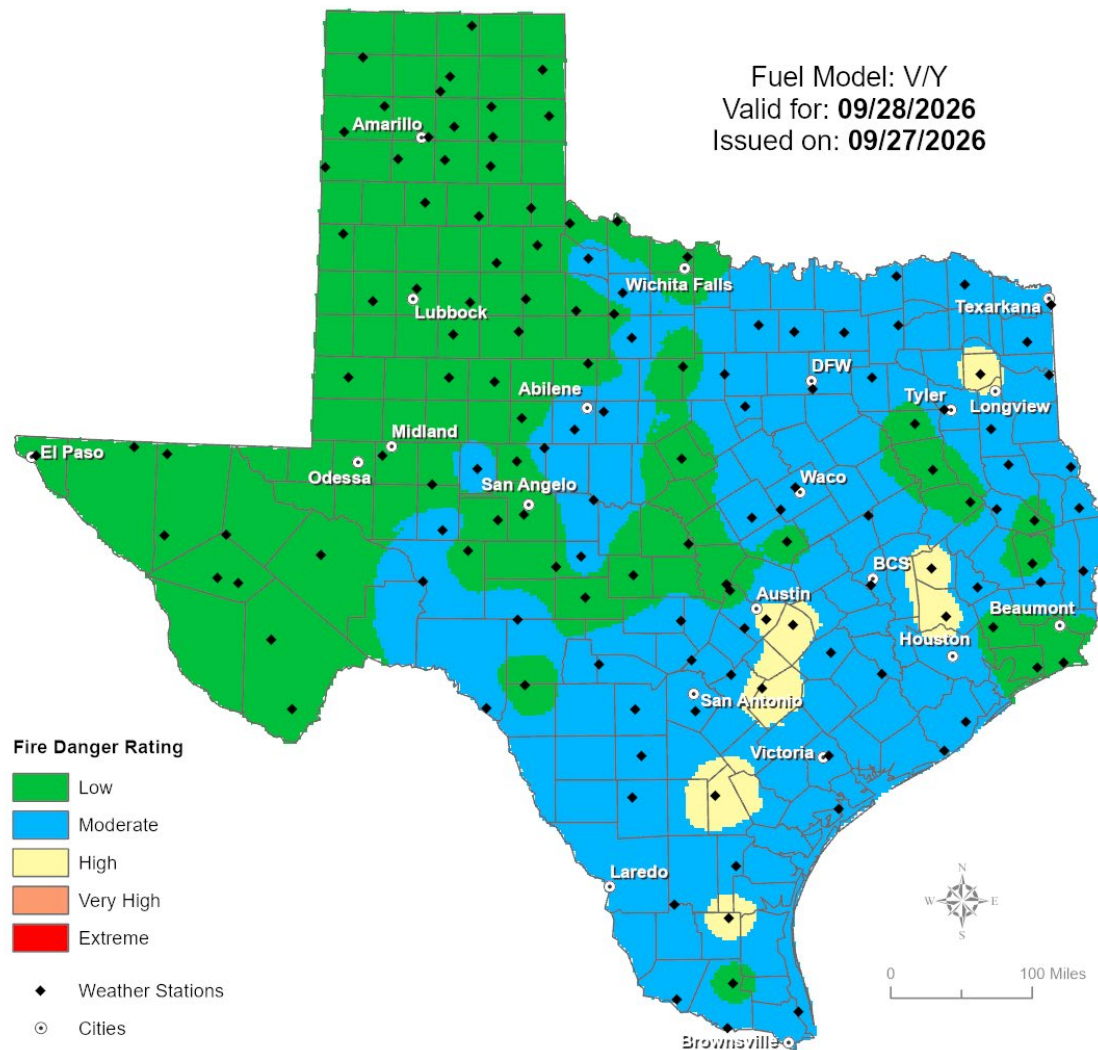

Tropical moisture will overspread the region during the early to middle part of the week, promoting very heavy rainfall for portions of the area. Soils remain saturated across SE New Mexico and in Culberson County from last week's rains/flash flooding. As a result, a Flood Watch has been issued for these locations from Monday evening through early Wednesday morning.

Weather Advisory/Statement/Watch/Warning Issued

DATE	WARNING TYPE	LOCATION
09/27/26	Severe Thunderstorm Warning	Edwards, Grayson, and Parker Counties
