Hazardous Weather

Hazardous Weather

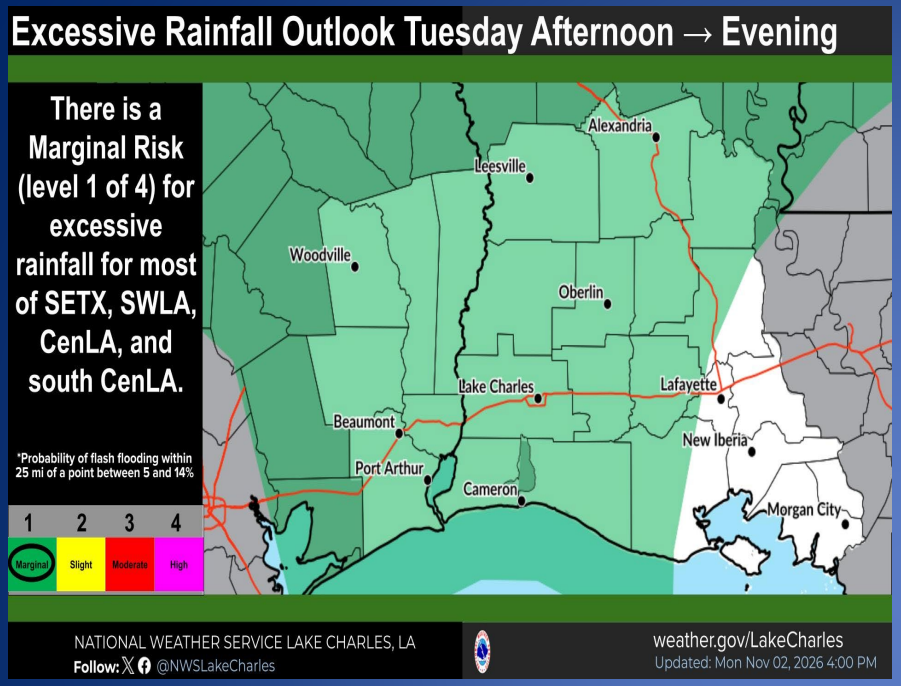

Strong north winds are blowing across the panhandles this morning and will continue to do so through the afternoon. These winds will finally weaken going into the evening hours. While the winds blows it can make travel harder, especially on east/west routes. These winds are bringing in colder air thus the temperatures will be cooler today.

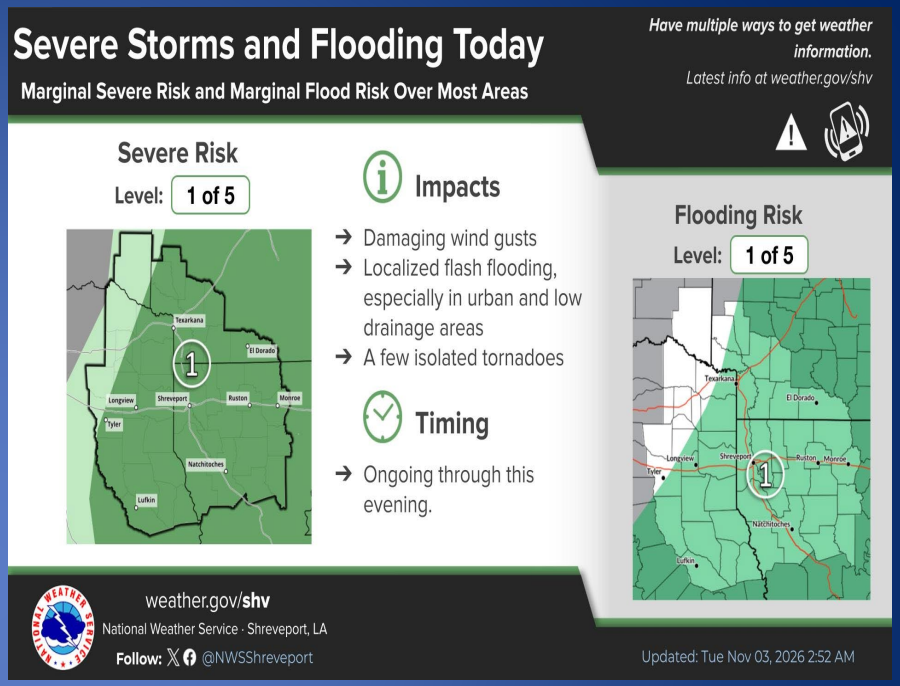

Scattered to widespread showers and thunderstorms expected Tuesday as a cold front pushes through. A few storms will have the potential to becoming strong to severe (Marginal Risk - level 1 of 5). In addition, locally heavy rainfall will be possible (Marginal Risk - level 1 of 4) in any of the stronger storms. The greatest risk of severe weather and heavy rain is generally east of I-45.

Hazardous Weather

Some storms ahead of a cold front on late Tuesday afternoon and evening may produce high rain rates in a short period of time. If these high rainfall rates fall over urban poor drainage areas, some street flooding will be possible.

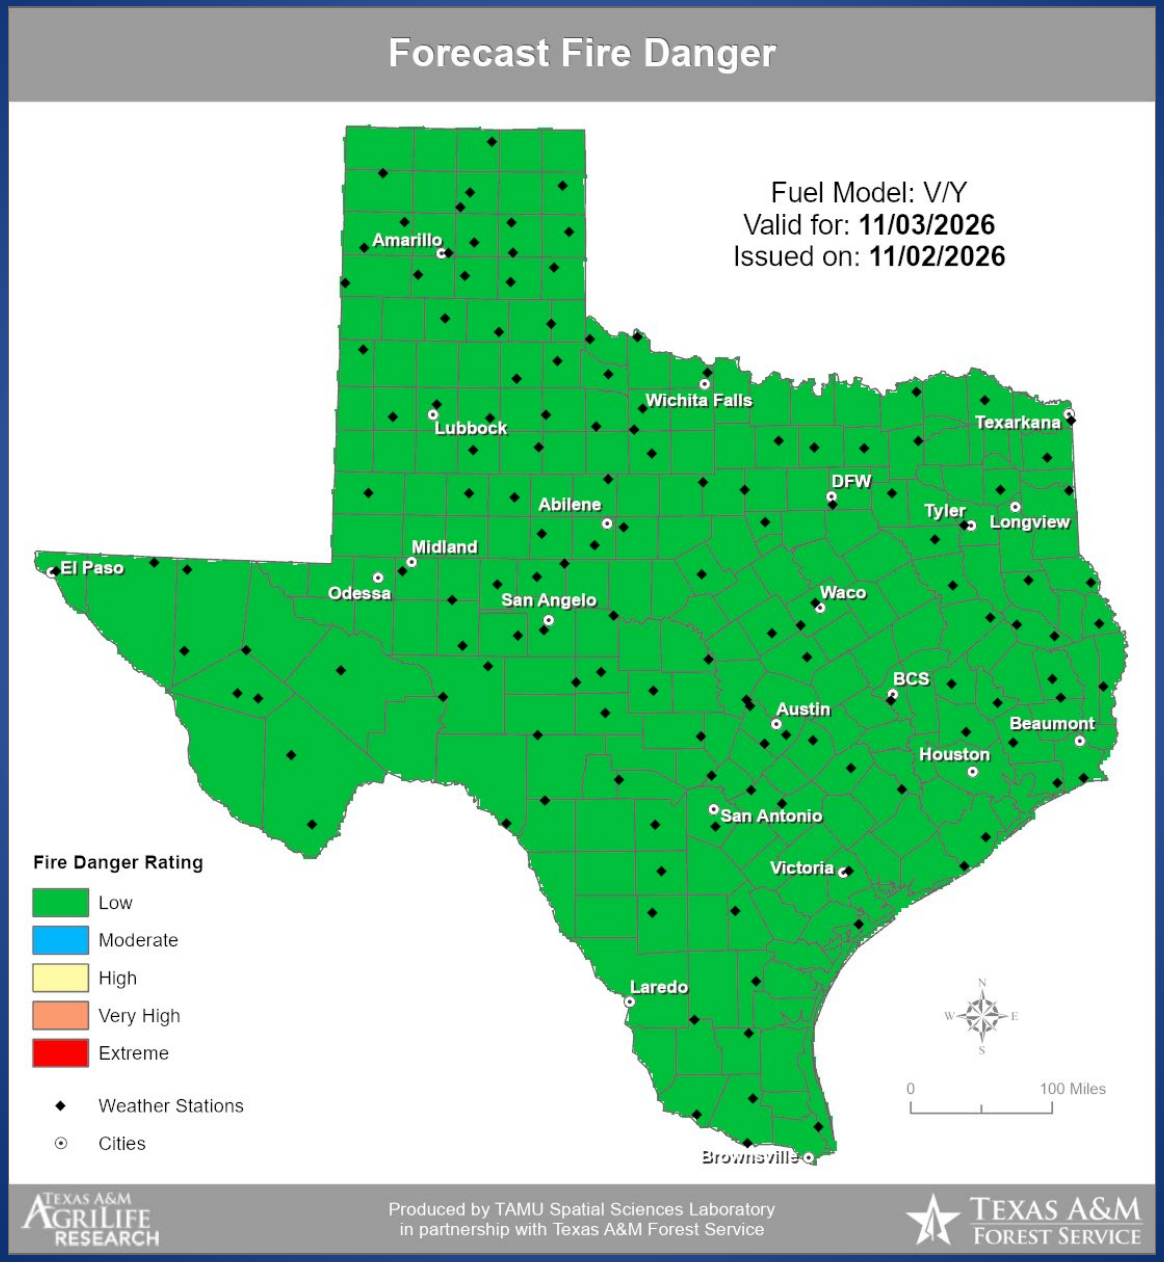

Widespread rainfall with embedded thunderstorms expected across the ArkLaTex today. Hazards include strong winds, heavy rainfall, and the remote possibility of brief tornadoes with some storms.

Weather Advisory/Statement/Watch/Warning Issued

DATE	WARNING TYPE	LOCATION
11/02/26	Tornado Watch	Archer, Baylor, Brown, Callahan, Clay, Coke, Coleman, Comanche, Concho, Cooke, Eastland, Erath, Foard, Hardeman, Haskell, Hood, Irion, Jack, Jones, Knox, Montague, Nolan, Palo Pinto, Parker, Runnels, Shackelford, Stephens, Sterling, Taylor, Throckmorton, Tom Green, Wichita, Wilbarger, Wise, and Young Counties
