High Temperature Forecast Displayed

Weather Forecast Office

Fort Worth, TX

Issued Jun 24, 2020 4:34 AM CDT

- Rain chances continue mainly east of I-35 & south of I-20
- Severe weather appears unlikely at this time
- Locally heavy rain and frequent lightning will accompany the stronger storms
- High Temperatures in the 80s

NWSFort Worth

weather.gov/fortworth

Moisture wrapping around a low pressure system located over Southeast Texas will lead to more rain chances for parts of the region on Wednesday. The best rain chances will be south of I-20 and east of I-35, where the best moisture will be located. Severe weather is unlikely, but some storms will be capable of producing frequent lightning and heavy rain. Otherwise, temperatures should remain below normal with highs generally in the 80s.

A Rainy But Warm Day Ahead

Locally Heavy Rainfall Possible Today

Weather Forecast Office

Corpus Christi, TX

Issued Jun 24, 2020 5:20 AM CDT

NWSCorpus

weather.gov/crp

Scattered to numerous showers and thunderstorms are expected today. Some storms will produce heavy rainfall, which could lead to some flash flooding. Please use caution today. Otherwise, warm temperatures are expected under mostly cloudy skies.

Hazardous Weather

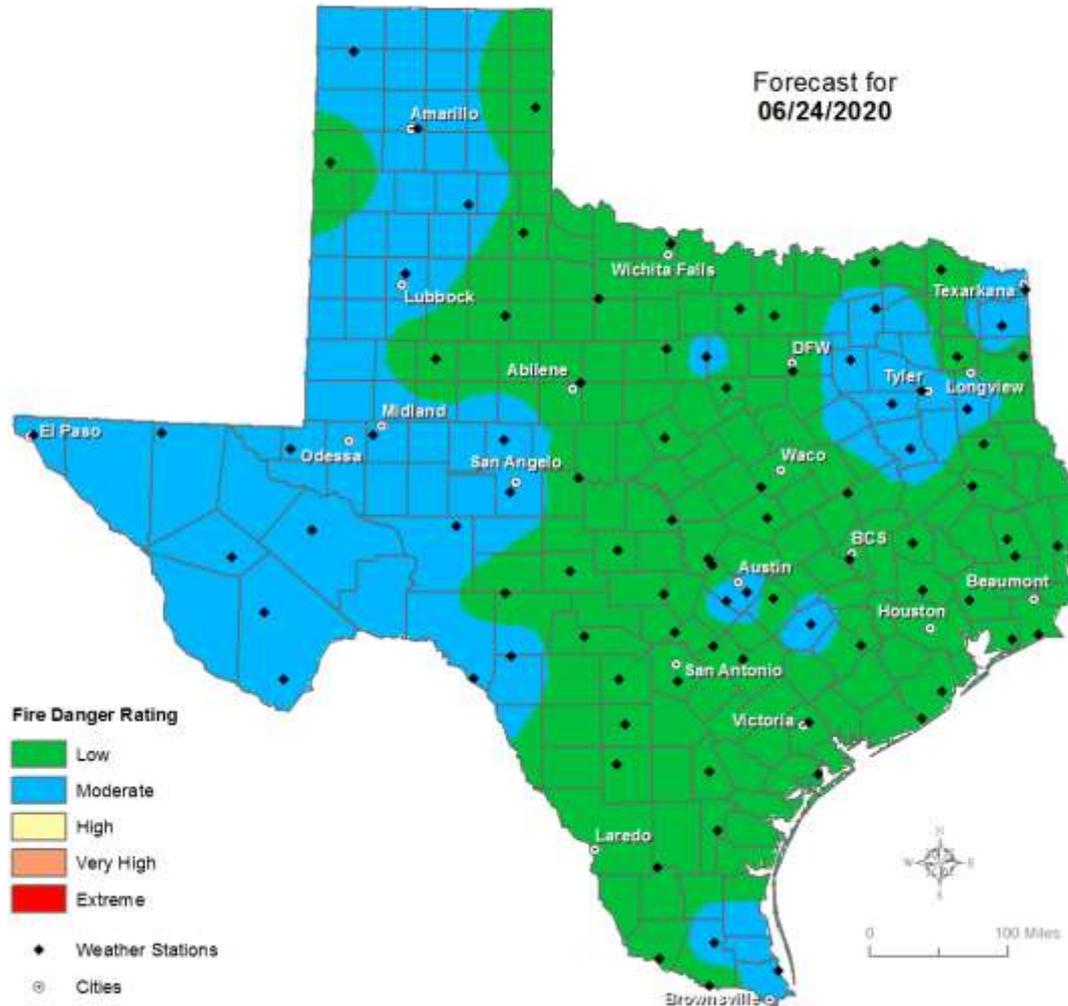

Scattered showers and thunderstorms are expected across Deep South Texas today. Some of these storms could be strong to severe and produce locally heavy rain. Mariners should exercise caution on the Gulf waters with moderate southerly winds.
